DETAILED ACTION

Specification

1. The drawings are objected to because the boxes in figs. 1 – 18 are wordily labeled. All the boxes in all of the figures should be labeled (for instance boxes 20, 50, 30, 61, 60, 83, 84 should be labeled as “conversion circuit”, “biasing source”, “shifting circuit”, and so forth). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1 – 71 are allowable.
3. Reasons for allowing these claims will be provided in the next office action.
